PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering undergraduate with internship experience in data science, backend API development, and applied AI systems. Hands-on with Python, SQL, and Scikit-Learn for predictive modeling and data analysis, with experience integrating ML workflows, REST APIs, and LLM-based retrieval systems into full-stack applications. Comfortable across model development, backend services, frontend interfaces, and API testing.

TECHNICAL SKILLS

Programming: Python | Java | C++ | JavaScript | TypeScript | SQL
ML & Data: Pandas | NumPy | Scikit-Learn | PyTorch | Transformers | Feature Engineering | Predictive Analytics | Computer Vision
Web & Backend: React.js | Next.js | Node.js | Express.js | FastAPI | REST APIs | Tailwind CSS
Databases & Tools: MySQL | MongoDB Atlas | Postman | Git | GitHub | Docker | RAG | LangGraph | Google Gemini API

EXPERIENCE

IBM — Data Science Intern Jun 2026 – Jul 2026
Digital Advertising Analytics Project

- Built an end-to-end analytics application in a three-member team, spanning data processing, machine-learning workflows, backend APIs, and frontend dashboards.
- Implemented prediction, anomaly-detection, and K-Means clustering workflows in Python and Scikit-Learn for campaign performance analysis.
- Integrated ML outputs with the Google Gemini API and served results through FastAPI, React/Next.js, and MongoDB Atlas, debugging integration issues across services.

FYNTL AI (Sangrah Innovation) — Web Development & AI Testing Intern Jun 2025 – Aug 2025
AI Analytics Product

- Tested AI-powered REST APIs through structured Postman scenarios, validating responses, edge cases, and reliability against defined behavior standards.
- Built responsive interfaces with React.js and Tailwind CSS and debugged frontend-backend integration issues across product workflows.
- Reproduced defects and validated fixes to support release quality and consistency.

IMPART (NGO) — Data Analytics Intern Jun 2024 – Aug 2024
Community Monitoring and Evaluation

- Cleaned, transformed, and analyzed survey datasets using Python and SQL, and prepared structured analytical reports for monitoring and evaluation activities.

PROJECTS

Multi-Agent AI Development Platform Aug 2026 – Present
Python | FastAPI | LangGraph | RAG | LLMs

- Designing a modular multi-agent platform with Research, Developer, and Platform components integrated through shared services and defined interfaces.
- Building a Hybrid RAG pipeline for document retrieval, embedding-based search, relevance ranking, and citation verification.
- Implementing versioned API contracts, structured logging, standardized error handling, and trace propagation for reliable service integration.

Alpine Explorer March 2026 – Present
Python | PyTorch | Swin Transformer | FastAPI | Next.js | GeoTIFF

- Building a satellite-imagery computer-vision pipeline for preprocessing, quality masking, and dataset construction for terrain intelligence and travel-risk analysis.
- Designing geographic train/validation/test splits and integrating model outputs with FastAPI and Next.js for reproducible ML experimentation.

Diabetic Tracker Jan 2025 – Mar 2025
Python | Scikit-Learn | Data Analytics

- Built a predictive analytics application covering data cleaning, missing-value handling, feature engineering, comparative model evaluation, and an interactive interface for displaying model-generated predictions.

EDUCATION

University of Petroleum and Energy Studies (UPES), Dehradun Aug 2023 – May 2027
B.Tech in Computer Science & Engineering; CGPA: 7.45/10
Class XII (CBSE): 78% | Class X (CBSE): 82%
